Mars Facts:

- Mars is half the diameter of Earth
- A year on Mars is 687 Earth days
- One day, (sol), is 24 hrs. 39 minutes
- One-third the gravity of Earth
- The average temperature: -81°F
- There is water on Mars
- Mars has two small moons
- Mars has the tallest mountain in the Solar System

John F. Kennedy
May 25, 1961
Addressing Congress

“We must continue to go into space for the future of humanity. I don’t think we will survive another hundred years without escaping beyond our fragile planet.”

-Stephen Hawking, Physicist

“Humans will become extinct
if we do not reach
beyond Earth.”

-Elon Musk, Founder SpaceX

SPINOFF TECHNOLOGY

The background of the image is a dynamic, abstract composition of numerous thin, curved lines of light. These lines radiate from a central, bright white point, creating a sense of depth and movement. The colors of the lines transition from deep blues and purples in the upper and outer regions to vibrant yellows and oranges in the lower and inner regions, suggesting a spectrum of energy or data. The overall effect is reminiscent of a high-speed light trail or a stylized representation of a technological network.

Astronomer

Astrophysicist

Astrobiologist

Author

“Maybe we are on Mars because we have to be, because there is a deep nomadic impulse built into us by the evolutionary process—we come after all, from hunter-gatherers and for 99.9% of our tenure on Earth, we’ve been wanderers. And the next place to wander is Mars.”
-Carl Sagan
